

Instructor: Dr. Gary Schultz
Phone: 696-7057 (Dr. Schultz)

Office: S309

email: schultzga@marshall.edu

Classroom: Science 374
Office Hours: MW 10:30–12 PM; T 10–12 PM

Time: MWF 9:00 - 9:50 PM

Required Text: Microbiology, 4th ed.; Slonczewski and Foster; Norton

Course Description: Principles of Microbiology - Basic microbiology, fundamental principles of microbial action, physiological processes, immunology, ecology, disease process. (3 credit hours; PR: BSC 121 with grade of C or better or equivalent).

Course Student Learning Outcomes	How students will practice each outcome in this Course	How student achievement of each outcome will be assessed in this Course
Students will have gained an understanding of the basic principles related to Microbiology including: <ul style="list-style-type: none">Diversity of microorganisms and their basic characteristics.Metabolic processes and nutritional needs of microorganisms.Molecular and cellular features of different members of the microbial world.Non-specific and specific mechanisms of host defenses against microorganisms and the epidemiology of disease.The diverse roles and impact of microorganisms on other living things.	Read assigned text. Answer study questions in text. Attend class and pay attention. Study lecture notes, including Powerpoints.	Four exams and final

IMPORTANT POLICIES**Grading and Course Requirements:**

Letter Grades will be assigned based on what percent of the total points are earned.

A = 90% or more of the total points; **B** = 80 – 89.9% of the total points; **C** = 70 – 79.9% of the total points; **D** = 60 – 69.9% of the total points; **F** = 59.9% or less of the total points

Points are earned as follows:

600 pts: Exams 1 – 4. Each worth 100 pts; **Final exam** is worth 200 points. In class assignments MAY be given that will be worth points. These will be announced ahead of time IN CLASS!

Attendance. Attendance at all scheduled lectures and exams is expected. Lectures are only given once. If you miss class, please obtain notes/information from a classmate. **If you must miss an exam for any reason**, it is your responsibility to contact the instructor prior to the exam period. Note that **Makeup Exams** will be scheduled at my discretion. It is your responsibility to notify me that you have to take a make-up exam. Make-up exams may be given in multiple choice, essay, or short-answer format at my discretion. **Written excuses for legitimate absences must be obtained. If an exam is missed without a university-approved excuse, a grade of 0 will be assigned for that exam.**

Conduct in class: Please behave respectfully during class. Behaviors such as excessive chatting with other students, note passing, texting, websurfing, etc., are disruptive to me and to other students. Students habitually engaged in these activities may be asked to leave the class that day. If you need to text, e-mail, or otherwise stare at your screen during class, please DO NOT COME to class. These activities are potentially disruptive to other students who are trying to learn. Please turn off (silence) your cell phones, pagers, etc. No electronic devices will be needed, and none will be permitted, during exams. The use or access of an electronic device during an exam will be considered evidence of academic dishonesty.

Office Hours – Feel free to drop by at any time during posted office hours, however people who call ahead for an appointment will be given priority. ***An appointment is required outside of posted office hours.***

Responsibility. This is a core course in the Biology curriculum. It is time to start critically examining the information that you encounter, and incorporating it into the context of your knowledge base. It requires effort on your part. More importantly, it requires that you take full responsibility for your learning experience. The amount that you get out of this course will depend upon the amount of work you are willing to put into it.

Blackboard - Powerpoint Outlines or notes **MAY** be made available on Blackboard. These outlines are provided by the instructor as a courtesy to the students. The instructor reserves the right to change, delete, update or otherwise modify these files at any time. There is **no guarantee** that outlines will be posted. These outlines are not intended to substitute for taking your own notes in class. They are not guaranteed to be comprehensive. There may be information given during lectures that is not in the PowerPoints. These outlines are not a substitute for regular class attendance. Generally, students who rely solely on the PowerPoint notes do not do as well on the tests as students who take their own notes or use a combination of their own notes and the posted PowerPoints. **ANNOUNCEMENTS will be posted on Blackboard and sent to Marshall emails. You are expected to check regularly so as not to miss any important course-related information.**

Approximate Schedule and Material to be Covered – The following is an estimated class schedule of topics to be covered and accompanying textbook chapters. Specific lecture topics covered may vary. Listed chapters and the order in which they are covered is subject to change at any time. It is not the intention to cover every chapter in its entirety. It is recommended that students read all chapters listed as well as any other posted or referenced materials. Lectures will highlight specific sections of each chapter. You will be tested in detail on material covered in lecture and more generally on the other sections of chapters listed. Additional material not contained in the textbook may be given during lectures. **The best strategy is to read the chapters indicated, attend lectures and take notes.**

MTG #	Day	DATE		
1	8/21/2017	M	ECLIPSE	No Class
2	8/23/2017	W	Syllabus/Introduction	The Microbial Cell
3	8/25/2017	F	Ch 1-5	
4	8/28/2017	M	Labor Day – NO CLASS	NO CLASS
5	8/30/2017	W	Ch 1-5	
6	9/1/2017	F	Ch 1-5	
	9/4/2017	M	Ch 1-5
