

Instructor:

Dr. Howard L. Richards

Instructor's Schedule (including office hours*):

	Monday	Tuesday	Wednesday	Thursday	Friday	
08:00 AM		PHY 203		PHY 203		Office: S 105
09:00 AM	PHY 201		PHY 201		PHY 201	
10:00 AM	Office Hours			PHY 204		Phone: 304-696-6466
11:00 AM						
12:00 PM						
01:00 PM						
02:00 PM		PHY 101L	Office Hours	PHY 101L		Email: richardsh@marshall.edu
03:00 PM						
EXAM WK	Monday	Tuesday	Wednesday	Thursday	Friday	
08:00 AM		PHY 204		PHY 203	PHY 201	
03:00 PM				PHY 101L		

Textbook:

College Physics, by Eugenia Etkina, Michael Gentile, Rutgers University, and Alan Van Heuvelen, Addison-Wesley, 2014.

Recommended: *College Physics*. OpenStax College. 21 June 2012. Download for free at <http://cnx.org/content/col11406/latest/>.

Catalog Description:

201-203 General Physics. 3 hrs. I, II, S.

A course in general physics for all science majors with the exception of physics and engineering majors. 3 lec. (PR: MTH 127 or 130 and MTH 122 or 132; CR: PHY 202 and 204 for 201 and 203, respectively; 201 must precede 203)

General Description:

This course is the second half of a one-year introductory course in physics that uses algebra and trigonometry but not calculus. It is designed for students having their main interest in Biology, (Pre)Medicine, Architecture, Technology, or the Earth and Environmental Sciences. At the end of this course the student should be able to apply sound reasoning skills and the principles and formulae of physics to solve simple problems in electricity and magnetism. A very brief introduction to modern physics is included as time permits.

* Office hours are subject to change, with notice given in class and on the web page. The instructor will make a serious effort to be in his office during office hours, but circumstances will sometimes require him to be elsewhere. Students are strongly urged to make appointments in advance when possible.

Grades:

F < 60 ≤ D < 70 ≤ C < 80 ≤ B < 90 ≤ A Max score 105 in homework.
 20% Exam 1 20% Exam 2 30% Final Exam 5% Highest Exam Grade
 10% Online Homework 5% Presentations
 5% Math Test 1 5% Math Test 2

Students making a score of less than 1/2 the class average on the final exam will fail the class. For example, if the class average is 80, you must make at least a 40 on the final to pass.

Course Learning Objectives:

Student will ...	Practiced by	Assessed by
Identify the equations and principles needed to solve problems involving electricity, magnetism, or optics.	Classroom discussions, Presentations, Homework	Exams
Use graphs, sketches, and/or diagrams as aids in conceptualizing physics problems and explaining their answers.		
Formulate and clearly communicate valid strategies for solving word problems involving electricity, magnetism, or optics.		
Use basic algebra and trigonometry to calculate physical quantities.		
Apply to physics problems the basic operations of vector algebra.		

Exams:

Each hour exam will cover the material presented since the last hour exam, but note that mastery of earlier concepts and methods may be necessary to complete later problems. The final exam is comprehensive. Exams will include a mix of problems which must be solved in detail – showing the steps is important – and multiple-choice questions that will test the student's ability to set up problems and demonstrate qualitative understanding.

Final Exam is Required:

From the *Undergraduate Catalog*: “Students are required to take all regular examinations. If a student attends a course throughout the semester and is absent from the final examination without permission, the instructor counts the examination as zero and reports the final grade of *F*. If the absence is the result of illness or some other valid reason beyond a student's control, the instructor reports a grade of *I*. In all cases, the student must verify the reason for the absence.”

Math Tests:

After a brief math review, there will be a test of the basic math skills needed for this course: vector algebra, basic trigonometry, quadratic equations, and the simultaneous solution of linear equations. A similar test will be given just before the first hour exam.

Homework:

Homework is online at www.masteringphysics.com. Some textbooks may come with a key for access to masteringphysics included, but if you do not have such a key, you can purchase access through the web site. The course ID is PHY203FALL2015RICHARDS.

Problems with the technology of the website should be directed to the attention of customer support. Only problems with the physics should be addressed to the instructor, either during office hours or (since any difficulty you have is probably shared by several other students) during class time.

Presentations:

Students must use the problem-solving sheet, which can be found on the MUOnline page for this course, for all presentations, which will show the solution in detail of one problem. The same problem-solving sheet will also be used for some exam problems.

The problem-solving sheet is used for two reasons.

- It will promote good problem-solving habits.
- It will help students earn partial credit for difficult problems.

Problems are from the OpenStax College textbook (<http://cnx.org/content/col11406/latest/>), possibly with some small modifications.

Problem assignments and instructions are on MUOnline in the “Presentations” blog under “Course Content”.

Academic Dishonesty:

“Academic Dishonesty is something that will not be tolerated as these actions are fundamentally opposed to ‘assuring the integrity of the curriculum through the maintenance of rigorous standards and high expectations for student learning and performance’ as described in Marshall University’s Statement of Philosophy.” Cheating and other forms of academic dishonesty will bring serious sanctions, including possible expulsion, as described in the *Undergraduate Catalog*.

Cheating on an exam or quiz will result in being reported to the Dean of Students and, at minimum, either (a) having all suspect work marked wrong or (b) having the course grade reduced by one letter grade, whichever is the heavier penalty.

You may work together on homework, but do not just copy someone else's answers. Not only is this dishonest, it will make you more likely to do badly on the next test.

Policy for Students with Disabilities:

Marshall University is committed to equal opportunity in education for all students, including those with physical, learning and psychological disabilities. University policy states that it is the responsibility of students with disabilities to contact the Office of Disabled Student Services (DSS) in Prichard Hall 117, phone 304 696-2271, to provide documentation of their disabilities. Following this, the DSS Coordinator will send a letter to each of the student's instructors outlining the academic accommodation he/she will need to ensure equality in classroom experiences, outside assignment, testing and grading. The instructor and student will meet to discuss how the accommodation(s) requested will be provided. For more information, please visit <http://www.marshall.edu/disabled> or contact the Disabled Student Services Office.

Students with Medical Conditions:

In addition to the above, students with medical conditions, temporary or permanent, that may require special attention (for example, epilepsy) or accommodation should inform the instructor as soon as possible.

Your privacy will be respected.

University Policies:

By enrolling in this course, you agree to the University Policies listed below. Please read the full text of each policy by going to www.marshall.edu/academic-affairs and clicking on "Marshall University Policies." Or, you can access the policies directly by going to http://www.marshall.edu/academic-affairs/?page_id=802.

Classroom Behavior:

Disorderly conduct that interferes with the normal classroom atmosphere will not be tolerated. The classroom instructor is the judge of such behavior and may instruct a disorderly student to leave the room with an unexcused absence. More serious misconduct may result in a complaint to the Office of Judicial Affairs. "Official University action will be taken when a student's or student group's behavior violates community standards, interferes either with the University's educational purpose, or with its duty to protect and preserve individual health, welfare, and property. When the behavior is aggravated or presents a continuing danger to the University community, accused students are subject to separation from the institution."

As a rule, **no food or drink** is allowed in the classroom. This is not always rigorously enforced, but certainly **it is never permissible to leave a mess**, whether crumbs or empty bottles, nor to distract the students around you. You are a grown-up, so act like one and be considerate.

Along the same lines, **all cell phones must be turned off or set to vibrate only** before the beginning of class. Any student who takes a call must leave the classroom to do so. Phone calls may not be placed or received during quizzes or tests. No devices may be used to play games or watch videos unrelated to classroom discussions.

You may not use your phone as a calculator during tests, not any other tablet or device capable of sending or receiving text, emails, video, or phone messages. You can get a very good scientific calculator (e.g., Casio *fx-300ES PLUS*) for less than \$20; I recommend choosing one with two-line display (so you can check for typos in your input) and at least 3 memory locations (usually named A, B, C, ...) in which you can store intermediate results to avoid rounding error. Of course, if some other department required you to buy an unnecessarily expensive graphing calculator, you can use that, too.

Please **do ask questions** if you do not understand a concept, derivation, or calculation. Do not be embarrassed to ask; if you have a question, others probably have the same question! Let me know if I am going too fast or too slow. Private chats with other students, on the other hand, must be kept to an absolute minimum during class time; they are very distracting.

Schedule (except for the Final Exam, exam dates are subject to change):

Mon, Aug 24, 15	First day of classes
Thu, Aug 27, 15	Math Test 1
Fri, Aug 28, 15	Last day to add a class
Mon, Sep 7, 15	Labor Day Holiday – University Closed
Fri, Sep 18, 15	Application for December graduation due
Thu, Sep 24, 15	Math Test 2
Tue, Sep 29, 15	Exam 1
Thu, Oct 15, 15	Freshmen/Sophomore midterm grades due
Mon, Oct 26, 15	Schedule appointments with advisors for advance registration
Fri, Oct 30, 15	Last day to drop a full semester course
Mon, Nov 2, 15	Application for May graduation date
Thu, Nov 5, 15	Exam 2
Week of Nov 23	Thanksgiving Break
Week of Nov 30	Semana de los Muertos
Fri, Dec 4, 15	Last day to completely withdraw
Thu, Dec 10, 15	8:00 am Final Exam
Mon, Dec 14, 15	Grades due at noon
