## PLS (NRRM) 405/505 Park & Recreation Ecology

Fall 2014, 3 Credits, SEC 101 (CRN 3831) T/R: 02:00 – 03:15pm Room: Morrow Library Commons

#### Instructor

Min Kook Kim, Ph.D. Office: Prichard Hall 212 E-Mail: kimm@marshall.edu Phone number: 304-696-3748 Fax number: 304-696-6533 Office Hours: M/W: 09:50 – 11:50am, T/R: 10:50 – 11:50am Other times by appointment

#### **University Policies**

By enrolling in this course, you agree to the University Policies listed below. Please read the full text of each policy be going to <u>www.marshall.edu/academic-affairs</u> and clicking on "Marshall University Policies." Or, you can access the policies directly by going to <u>http://www.marshall.edu/academic-affairs/?page\_id=802</u>

Academic Dishonesty/ Excused Absence Policy for Undergraduates/ Computing Services Acceptable Use/ Inclement Weather/ Dead Week/ Students with Disabilities/ Academic Forgiveness/ Academic Probation and Suspension/ Academic Rights and Responsibilities of Students/ Affirmative Action/ Sexual Harassment

#### **Required Texts, Additional Reading, and Other Materials**

- 1) <u>Main Text</u>: Weekly reading materials will be assigned by the instructor.
- 2) <u>Recommended</u>, but **not required**:

- Manning, R. (2009). *Parks & People: Managing Outdoor Recreation at Acadia National Park.* Burlington, VM: University of Vermont Press (ISBN-13: 978-1584657910).

- Cole, D.N. & Yung, L. (2010). *Beyond Naturalness: Rethinking Park and Wilderness Stewardship in an Era of Rapid Change*. Washington, DC: Island Press (ISBN-10: 1597265098).

## **Course Description**

Park/Recreation Ecology refers to the scientific study examining recreational impact on the environment. It can be specifically defined as the field of study that examines, assesses and monitors visitor-induced impact. Therefore, the course is designed to help students identify and evaluate the level of resource impact, understand factors that cause impact, and suggest appropriate management actions to minimize impact under given conditions. Additionally, both social/biophysical science monitoring techniques for natural resources management will be introduced. While the course covers natural and human disturbance factors based on traditional disturbance/forest ecology, the spatial scope of the course is restricted to national forests/parks and protected/conserved areas. Various studies in professional journals will be reviewed and analyzed by each student during the semester (**Pre/co-requisites:** N/A)

## Natural Resources/Recreation Management Discipline-Specific Learning Outcomes

Students will *demonstrate* the ability to *identify* natural resource and or/recreation management problems, *propose* appropriate management actions to address those problems, and *evaluate* the potential implications of their proposed management actions.

Course Student Learning Outcomes (Questions)	How students will practice each outcome in the course	How student achievement of each outcome will be accessed in the course
Students will <i>understand</i> magnitude and significance of recreational impact	In-class examples/materials, student-led group discussion	Group discussion 1-3, exam 1, research question analysis presentation/paper
Students will <i>identify</i> mechanism/relationship between amount of visitor use and intensity of impact	In-class examples/materials, student-led group discussion, low-stake writing	Group discussion 4-5, exam 1, research question analysis presentation/paper
Students will <i>distinguish</i> social and biological factors contribute to recreational impact	In-class examples/materials, student-led group discussion	Group discussion 4-5, exam 1, research question analysis presentation/paper
Students will <i>understand</i> how much recreational impact is	In-class examples/materials, student-led group discussion	Group discussion 6-7, exam 1, research question analysis

## **Course Student Learning Outcomes and Assessment Measures**

acceptable or unacceptable		presentation/paper
under given condition		
Students will evaluate various	In-class examples/materials,	Group discussion 8, exam 1,
types of social and biological	student-led group discussion,	research question analysis
monitoring methods and select	low-stake writing	presentation/paper
appropriate techniques		
through management		
framework		
Students will <i>apply</i> various	In-class examples/materials,	Group discussion 9-10, exam
site and visitor management	student-led group discussion	1, research question analysis
tactics and strategies for		presentation/paper
controlling recreational impact		
under given conditions		

## **Course Requirements**

- 1) **Exam**: There will be one in-class exam during the semester (closed book test).
- 2) <u>Research Question Analysis Presentation</u>: A total of six different research questions will be analyzed by each student group. The research questions will be assigned to each group later this semester and presentation schedule will be arranged at the end of the semester. Each group is expected to prepare max. <u>30 minute power point presentation</u> about the research question assigned.
- 3) **Research Question Analysis Paper:** In addition to the research question analysis presentation, each group will be required to submit an analysis paper about the research question (approximately three pages)
- Journal Article Review: Students will be required to review <u>two</u> journal articles assigned by the instructor during the semester. The instructor will provide instructions for the expected content of assignment.
- 5) <u>Lab/Group Discussion/Activity</u>: Almost every week, students will be required to have a group discussion based on the questions that the instructor provides. The instructor will provide instructions for the group discussion, but individual students must perform the responsibilities of presenter and writer at least more than <u>five times</u>, in order to obtain full class participation point.
- 6) <u>Attendance & Participation</u>: Attendance will be part of your grade as noted below. <u>If</u> students miss more than 30 percent of the lectures, the instructor reserves the right to summarily assign you a failing grade for the course. In addition, 10 percent of the grade for this course is comprised of group discussions and activities, most of which will be

completed in class. Student will not be allowed to make-up in class discussions and activities missed due to unexcused absences. Absences will only be excused if they have been pre-approved by the instructor or if the student is able to document a valid reason for their absence (i.e. illness, death in family, automobile accident, the Dean of Students, etc.).

- 7) Extra Point Chance (1): To celebrate GIS day this year (November 19, Wednesday), the IST and Geography departments will be jointly hosting a series of events (GIS/RS poster presentation, guest lecture, geocaching event, etc.) in the Memorial Student Center. All interested faculty, students and staff are invited to participate in this poster presentation and geocaching event. Any types of GIS/RS posters including your past and on-going projects will be welcomed, and a small prize will be given for best graduate and undergraduate posters. In addition, if you present your past and on-going projects, you will receive two extra points. If you attend the student poster presentation (either morning or afternoon session), you will receive one extra point.
- 8) Extra Point Chance (II) MU PROS Participation: The Marshall University Park and Recreation Organization for Students (MU PROS) was created to promote active involvement in park and recreation related events on campus and in the community. Students in this course may earn up to <u>three points</u> of extra credit by participating in MUPROS meetings and events. A total of two points can be earned by participating in weekly MUPROS meetings (0.5 point earned per meeting). An additional one points can be earned by participating in MUPROS events (0.5 point per event).

### **Grading Policy**

Exam (20 pts.)

Research Question Presentation (20 pts.: instructor 15 pts., peer-evaluation: 5 pts.)

Research Question Paper (10 pts.)

Journal Article Review ( $15 \times 2 = 30$  pts.)

\* Undergraduate (Attendance: 10 pts.), \*Graduate (Additional reading assignment: 10 pts.) Group Discussion/Activity (10 pts.)

Total: 100 pts.

#### **Grading Scale**

100 – 93	А
92.9 - 85	В
84.9 - 77	С
76.9 - 70	D

#### **Additional Policies and Expectations**

- Class participation is essential for the successful completion of the course. Students are expected to read the assigned papers prior to class and to come to class ready to discuss what they have read. In the absence of meaningful classroom discussions/activity, quizzes may be given to ensure that readings have been done (<u>If students provide a</u> <u>quality group discussion question based on the assigned paper prior to class, the</u> <u>instructor will assign extra credit</u>).
- 2) Class materials can be found at MU-online (<u>http://www.marshall.edu/muonline</u>). The instructor will upload all lecture and class discussion files (pdf format) at MU-online in a timely manner. It is mandatory that students monitor the MU-online for updated class materials at least once a week.
- 3) Assignment (research question analysis + two journal article reviews) is expected to be professionally presented according to the following guidelines. The instructor will provide instructions for the expected style of assignment as well as the <u>sample</u> of the review assignment.
- 4) *Late Submission* is strongly discouraged. Assignment not submitted to the instructor on the specified due date will be considered late. Late assignment will be accepted with a penalty of 25 percent for each day that the assignment is late. Exceptions to this policy will be made only for extraordinary circumstances that are cleared with the instructor ahead of time or with documentation when advance notice is not possible (Assignment placed in my campus mailbox or slid under my office door will not be accepted after the deadlines).
- 5) *Classroom Etiquette*: Students are expected to exhibit proper classroom etiquette. This means, among other things, that classroom discussions should be appropriate and respectful, cell phones should be turned off and put away at all times, newspapers and other non-class related reading materials should not be on desks, and students should not pack-up to leave until class has been dismissed. Failure to exhibit proper classroom behavior will affect your participation grade.
- *Resources*: Students who find themselves in need of additional assistance are reminded that the instructor is available during office hours. Again, the instructor's office hours during the fall 2013 semester are as follows: M/W: 09:50 – 11:50am, T/R: 10:50 – 11:50am.
- 7) *Course Evaluation*: Mid-semester evaluation will be done by the instructor to identify students' suggestions on the course (i.e. pace and topic/subject of the course). Final

student course evaluation will be conducted during the last two weeks of the semester in a manner that maintains the integrity of the process and the anonymity of evaluators.
